**Subject:** RE: FS Section 1 Comment

Eric,

Dana reminding me that the Gasco and northern portion of the Siltronic riverbanks are part of the EPA early action project area. Riverbank data was specifically collected at the direction of EPA for the EE/CA. This data should be summarized in the draft Gasco/Siltronic EE/CA. See Appendix H.

DEQ will review and edit the groundwater language for the Gasco and Siltronic plumes.

Matt

One more thing Matt, can you tell me the metals associated with riverbank contamination at Kinder Morgan and GASCO/Siltronic?

Thanks, Eric

Eric,

When you send over the Section 1 revision today can you make sure to include the language on the stormwater pathway. We want to make sure that the language includes the need for continued implementation of DEQ's stormwater program. Just want to make sure that it cannot be held up by an RP as an argument that they do not need to continue with stormwater source control efforts. Also, please copy Alex.

Thanks,

Matt McClincy
